Argentina	Colonel Moldes Province	Javier Cesar Icardi	Radio Helicon TV ( R	Web- or Kiwi-SDR & remote antenna	Mini Whip antenna with ferrite core tune	A great storm with many at	The reception system was installed at head 24 of the Coror
Australia	Callignee	Graeme Zimmer	VK3GJZ	SDR- or Kiwi-SDR & local antenna	Welbrook Loop Antenna with RF-Space NetSDR	Unheard	Am on Solar power here and do get some interference from my solar power inverter. Local noise level is at -15dbuV but cannot see any sign of SAQ in the waterfall display. Can see strong signals from VTX3 in India and also North West Cape in Exmouth Aus. see pix at <a href="https://imgur.com/a/7dq4rj6">https://imgur.com/a/7dq4rj6</a>
Australia	Donnybrook Western Aus	Stephen Hatfield	Stephen Hatfield	SDR- or Kiwi-SDR & local antenna	6.5M tuned loop Hi Z pre amp into Spectrumlab	Unheard	
Austria	Feldkirch	Mario Kienspergher	OE9MKV	Radio receiver & local antenna	FT-871 + VLF-Converter to 10 MHz + "Biker-Loop" in the basement	RST 319 QRM	QRM S9+20 dB, RST319 relatively to that, of course.
Austria	Wilhelmsburg	franz filzwieser	OE3FFC	Radio receiver & local antenna	All homemade: SDR TRX, Converter SO42, Ferrite Ant 30cm with Preamplifier	QSA 5, QRK 5 Super clear Sigs. The best last years!	Congratulation to your 100J-Anniversary. Today the best sigs at last years. Thank you.
Austria	St.Pölten	Manfred Lechner	OE3MLW	SDR- or Kiwi-SDR & local antenna	ELAD FDM DUOr Receiver and OK2ZI Miniwhip Antenna	RST 488	QRM
Austria	Graz	Hermann Scharfetter	OE6TWF	SDR- or Kiwi-SDR & local antenna	Wellbrook ALA1530 (flex version, mobile equipment) with custom-built circular loop, diam 1m, 2 windings, 3 m above ground on lightweight spiderbeam mast. Receiver: RSPdx (SDRPlay), no extra preamps, PC with SDRUno. Antenna orientation optimized for best SNR.	35dB SNR	During the transmission an IQ wideband recording of the RF band between 10 and 260 kHz was made, containing also other VLF transmitters as well as several LW broadcasting stations transmitting at the same time. This recording is freely available at COHIRADIA under the link <a href="https://www.radiomuseum.org/dsp_cohiradia_detail.cfm?id=130">https://www.radiomuseum.org/dsp_cohiradia_detail.cfm?id=130</a>
Austria	Neulengbach	Andreas Oeller		SDR- or Kiwi-SDR & local antenna	Mini Whip, RME Babyface, Spectrum Lab	Clear Signal at startup, Signal disappeared at 11h13	Good Signal at startup, dieappeared 11h13, not buried in noise, just gone
Austria	Roggendorf	Hans Pammer	Hans Pammer	Radio receiver & local antenna	Hagenuk RX 1001 M, HDLA-12 Loop under the roof	RST 549, Noisy at my location, but well above noise	
Austria	Goessendorf	Helmut Siegl	OE6IEG	Radio receiver & local antenna	Kenwood TS2000 with up converter to 10 MHz, 300 Hz CW filter	RST 347 with interference	Antenna: 42 meter sloopier
Austria	Bregenz	Roland Manner	OE9RMV	Radio receiver & local antenna	TS590SG, Converter, wire antenna	20dB S/N	Thank you for Transmission, always a pleasure to receive SAQ. Happy 100th anniversary! 73, de Roland, OE9RMV
Austria	Villach	Ralf Siemieniec	Ralf Siemieniec	Radio receiver & local antenna	Selfmade simple VLF receiver with ferrite antenna, linked to notebook, using SAQrx for reception. Went out of the city to escape EMI disturbances, however reception was less good as in previous years. Two files linked: a photo of the receiver with notebook in the forest, one with the recorded signal. First part of the transmission is missing, as the BT connection from the computer mouse killed any reception until it was turned-off.	RST 357	<a href="https://www.broeselsworld.de/sonstiges/SAQ/SAQ-Reception_01DEC2024.jpg">https://www.broeselsworld.de/sonstiges/SAQ/SAQ-Reception_01DEC2024.jpg</a> <a href="https://www.broeselsworld.de/sonstiges/SAQ/SAQ_01DEC2024.wav">https://www.broeselsworld.de/sonstiges/SAQ/SAQ_01DEC2024.wav</a>
Austria	Wien	Zoltan Egyed	OE1EZA	Radio receiver & local antenna	Homebrew valve rig and rooftop wire	RST 349	Also followed on Youtube
Austria	Dobl-Zwaring	Museum Sender Dobl		Radio receiver & local antenna		S7 R5	Many thanks for your nice email!

Brazil	Glorinha - RS	Alencar Aldo Fossá	Alencar Aldo Fossá	Radio receiver & local antenna	ROHDE & SCHWARZ EK 896	RST	This beautiful Sunday morning, December 1, 2024, with my 500-meter long Beverage antenna, I managed, with great difficulty, to capture some letters of the 10 UTC transmission of the message with RST 339. I was very happy, despite the difficulties of the summer propagation that begins this month in the Southern Hemisphere. In the winter transmissions, in July, I tune in better to the SAQ. Hugs to everyone and congratulations to the entire Team that is maintaining this great heritage of humanity.

Germany	Wendelstein	Tobias Wirth	DQA509	SDR- or Kiwi-SDR & local antenna	RX: Kiwi SDR 2; Ant.: Active Monopole Dressler ARA 60	RST: 497	Dear SAQ Grimeton team, I am happy to be able to receive your transmission again. It's always a pleasure and, even for me far away from Grimeton, a bit of an adventure if my equipment will work, QRM will be low enough, and if I could receive your signal. With pleasure I also watched the video with the explanations and the "powering up". It is great how good the 100 years old machine is still working, also thanks to your work. Thank you very much! I am happy that I am a member of the Alexander Grimeton Friendship Association and that I can support your work in this way. Please keep up your great work! I am looking forward to attend a transmission live at Grimeton at some point. I wish you all a good Advent season. 73 de Tobias, DAQ509

Malta	Valletta	Ivan Privitera	9h1pi	Radio receiver & local antenna	Radio, VLF converter and T Antenna	559	Copied message: This is Grimeton radio station / saq in a transmission using the Alexander 200 Kw alternator from 1924 on 17.2 KHz. We proudly join Grimeton radio station to celebrate the centennial of the Alexanderson alternator, invented by our grandfather and great grandfather Ernst Alexanderson. We are grateful for everyone's work to preserve the UNESCO world heritage site. We hope the 100th anniversary year, that starts today, will help to shorten distances between people, as SAQ has always done. Hooray for 100 years of communications. Signed, Rik and Lauren Alexanderson, USA descendants of the inventor of the Alexanderson alternator , and the alexander Grimeton friendship association. For QSL info please read our website alexander.n.se DE SAQ SAQ SAQ SK

Poland	Bytom	Daniel Sczendzina	HF9D	Web- or Kiwi-SDR & remote antenna		579	
Poland	Warszawa	Adam Wysocki	SP5GOF	Radio receiver & local antenna	Self-made receiver (buffer + HPF + LPF), some random wire, sound card, computer (BeagleBone), and vlfirx-tools.	RST 389	Very strong QRM centered at 18 kHz made the reception practically impossible (something's visible on a spectrogram, but barely, and I can't set up filters to extract it). QRM suddenly disappeared at 9:58:08 UTC. Then I was able to capture (and hear) some of the VVV VVV VVV DE SAQ SAQ SAQ, before my recording stopped due to my stupidity (I forgot to reserve enough space on a memory card for it...).
							Although I didn't get the full transmission, for what I managed to record I give the RST of 379. R is 3, because a portion was clearly audible (5), but another portion (the one with QRMs) was completely lost.
							Here's the spectrogram and recording: <a href="http://www.chmurka.net/r/vlf/faq-2024-12-01/">http://www.chmurka.net/r/vlf/faq-2024-12-01/</a>
							Thank you for keeping the beast running!

United Kingdom	Braintree	Richard Witney	G4ICP	Radio receiver & local antenna	Homemade VLF converter + TS680 10MHz IF + 12m LW at 4m above ground.	589 best yet!	
United Kingdom	Edinburgh	Brian Howie	GM4DIJ	SDR- or Kiwi-SDR & local antenna	SDR play RSPdx 5ft multiturm untuned Octagonal loop HSDR software.	RST 559	Spacer wave was visible on waterfall.
United Kingdom	Buxton	Nick Rank		Radio receiver & local antenna	I used my usual home-brew VLF receiver, battery-operated with a ferrite rod aerial. With the electrical noise being so high in the house, I used the receiver on a local hill-top to escape the noise. Reception was clear with only slight interference from Russian station RDL, on 18.1kHz. This is because of the limited selectivity of my simple receiver.	SIO 343	SAQ heard on 1/12 at 0944UTC with test bursts of carrier (on/off every few seconds.) This was quickly followed by "SAQ SAQ" then the usual strings of IDs: "VVV VVV VVV DE SAQ SAQ SAQ" which continued without interruption until 0959UTC. Nothing heard then until 1000UTC when the message commenced: "CQ CQ CQ DE SAQ SAQ SAQ....." This continued until 1009:20UTC when the message finished. Thank you for another very interesting radio event. I also watched the Youtube video which is even more interesting viewing after having heard SAQ "live" on 17.2kHz earlier. 73s. Nick
United Kingdom	Leeds	Jeremy Harmer	M0RVB	SDR- or Kiwi-SDR & local antenna	Airspy HF+ Discovery SDR, YouLoop antenna in loft, Windows 10 PC running SDR#, plus headphones to copy by hand	SNR +12.6dB	<a href="https://m0rvb.radio/saq-success.html">https://m0rvb.radio/saq-success.html</a> includes a screenshot

United Kingdom	Edinburgh	John Struthers	GM8CVN	SDR- or Kiwi-SDR & local antenna	UK Radio Astronomy Association E Field Probe Active Antenna and SAQ Panoramic VLF Receiver v0.98 software into Win 10 PC sound card.	RST 219	Signal strength seemed to steadily decline from 09:45 to 10:00 hrs. After 10:00 nothing was heard.
United States (USA)	Charlestown, NH	John Collins	KN1H	SDR- or Kiwi-SDR & local antenna	SDR-IQ and 400 foot end-fed wire tuned to 17.2 KHz	RST 559, Excellent reception, low noise, strong SAQ signal. Armchair copy of start-up and Anniversary message.	
United States (USA)	Burlington	Jay Rusgrove	W1VD	Radio receiver & local antenna	Modiified Amrad e probe > LNA > Delta 44 A/D > SpectrumLab	Close to best ever copy of SAQ this morning in over 20 years of monitoring ... 100% solid copy throughout tune up and message.	A short .mp3 clip at: <a href="https://www.w1vd.com/SAQ120124.mp3">https://www.w1vd.com/SAQ120124.mp3</a>
United States (USA)	Pawcatuck Connecticut	Christopher Bowne	AJ1G	Radio receiver & local antenna	Wandell und Goltermann AT-611 Selective Level Meter Antenna - 20+ foot vertical stationary mobile antenna mounted on 2012 Toyota Tacoma 4WD truck	Q5 -90 dBm in static crashes	Copied entire transmissions from initial tuning through end of message. Copyable throughout with some static crashes and mild interference from FSK just down frequency from SAQ. Looking forward to listening for the next Christmas Eve morning transmission! 73 and ZUT de Chris AJ1G Stonington CT USA
United States (USA)	Cohoe	Whitham D. Reeve	Whitham D. Reeve	Radio receiver & local antenna	Shop-built square loop antenna, 1.2 m diagonal connected to an SDRPlay SDRduo software defined radio receiver. Receiver operated by SDRuno software. See internet links below.	Reception very good, probably the best of all my attempts	I believe the relatively strong signals this time are the result of lowering the noise floor at the Cohoe Radio Observatory. Previously, I used heavily filtered switch-mode power supplies for all observatory RF electronics but replaced them with linear power supplies during fall 2024. This dramatically reduced the noise floor and improved the signal-to-noise ratio on my receiver dedicated to WWVB on 60 kHz to > 40 dB when the path is dark and also lowered the noise floor on my receiver dedicated to VLF comm transmissions. I was expecting better performance on SAQ transmissions and that came true.  Because of the time zone, I recorded both the I-Q bit stream from the receiver and the demodulated audio for analysis later in the morning.  I have only had chance to listen to the audio recording. The SAQ signals were quite strong this time and I could easily hear the transmission from 1000:00 to 1009:20 UTC. I have not yet analyzed the I-Q spectra.  <a href="https://reeve.com/Documents/Articles%20Papers/Reeve_CohoeVLFLoopAntenna.pdf">https://reeve.com/Documents/Articles%20Papers/Reeve_CohoeVLFLoopAntenna.pdf</a> and <a href="https://reeve.com/Documents/Articles%20Papers/Reeve_SquareLoopAntenna1.2m.pdf">https://reeve.com/Documents/Articles%20Papers/Reeve_SquareLoopAntenna1.2m.pdf</a>
United States (USA)	wasilla	Laurence Howell	KL7L	Radio receiver & local antenna	210m unterminated underwater and under lake ice wire bearing 011degT, 200:75 ohm transformer, 100m rg6 to Isomax DIN-2LI, Modified Soundblaster Xi-Fi, Spectrumlabs V2.96 b3, Audiocity, OBS/Iccream video	559	Live stream edited reception : <a href="https://www.youtube.com/live/TDplWtNmjzA">https://www.youtube.com/live/TDplWtNmjzA</a> Intermittent QRM from remote Telcos' SMPSU - nicer reception when it goes off towards the end! - Fridays test was a little better s/n and some of the best reception since I started listening - Excellent

United States (USA)	Canaan, NH	David McGaw	N1HAC	SDR- or Kiwi-SDR & local antenna	1.3M loop, N4CY preamp, Agilent 4396B and Signal Hound SA44B spectrum analyzers	Unheard	NAA@24kHz: -60dBm, Noise Floor: -122dBm
United States (USA)	Clarkdale	M. Skroch	AD7SK	Radio receiver & local antenna	Icom R-71A and end fed longwire antenna	Unheard	
United States (USA)	Lakehills	Samuel Blackshear	AB5YO	Radio receiver & local antenna	1m diameter loop using low-noise broadband trans-impedance preamplifier. Signal recorded using a Tascam DR-08 set to 96ksps with 24-bit resolution.	Carrier visible on waterfall spectrograph with 30Hz RBW in between heavy lightning discharges, but there was too much noise to actually hear and decode the message. Next time I will try to use an array to attempt nulling noise from the tropics.	I recorded an hour of spectrum between 10kHz and 35kHz, beginning very early before the SAQ transmissions and ending very soon after they finished. I can provide the file if needed.
United States (USA)	TRENTON	Joseph Karatka	WA2QZP	SDR- or Kiwi-SDR & local antenna	SDRplay RSPdx-R2 Antenna 1/4 wave 40-meter vertical.	Unheard	
United States (USA)	OSSIAN	gedas vysniauskas	w8bya	Radio receiver & local antenna	I use a RSPdx and active 30' elevated vertical antenna. Sensitivity is very good above ~15 kHz.	CW signal was not heard by ear. However during periods of QSB peaks a definite trace was seen in the waterfall of my SDR. It was clearly SAQ as I could see slight changes in frequency.	I was hoping to be able to copy CW this time as conditions on VLF were quite good. Many of the LWBC stations higher in freq were quite strong. QRN was present but lower than last 2 years. I do have several IQ recordings and I am hoping with different filters maybe able to pull out some CW by ear. Here in the middle of the USA it is much harder to copy SAQ than from the east coast near the ocean hi-hi. 73 es TU !!!
