

Country	City	Name	Call sign	Equipment	Equipment details	Reception Quality	Additional Information
Argentina	Ciudad Autonoma de Bue	Arnaldo Leonel Slaen	LU3AAL	Radio receiver and own antenna	LW converter, KX3 homebrew frame antenna	SINPO: 24442	"Mini-Whip" antenna, a homebuilt SDR
Argentina	Neuquén	Alejandro Alvarez	LU8YD	Radio receiver and own antenna	Grahn GS5-SE with ferritmodule VLF2 "Alexanderson", Pegelmesser MV61 (bandwidth 0,1 kHz), Hagenuk RX 1001 MVB (bandwidth 0,1 kHz)	Unheard	I am interested in being able to calculate the link with any VLF Propagation Software that you can suggest.
Australia	Batemans Bay	Elekessy, Peter	VK2AN	Radio receiver and own antenna	50cm square Idealloop per http://www.vlf.it/feletti2/idealloop.html with Behringer 192kHz USB interface and SpectrumLab to interpret the morse.	Intermittent signal at 17.2Khz seen using QRSS3 on Argo	
Australia	Kallista, Victoria	Gilbert John	VK3EDW			Received with fading QSB - visual on SDF https://vk3edw.blogspot.com/	
Australia	Melbourne	Bentley Stephen	VK3YJQ	Radio receiver and own antenna	5 meter vertical , with impedance transformer , Kenwood TS-850 , and down converter.	Unheard	Second attempt to receive message at 10:00 PM local time not successful. I watched the live stream video for both sessions. Excellent thanks, its truly a beautiful machine. On behalf of the many followers of SAQ here in Australia, thanks for the new transmission time. Please continue to do this for future events. I will work on an improved receiving situation in a more remote property which hopefully will avoid my local interference issues. Perhaps as the new sun spot cycle emerges this may also help receive the signal on our side of the planet.
Austria	Wiener Neudorf	Altmann Richard	Altmann	Radio receiver and own antenna	TRVC Yaesu 859, Antene Mini Whip, Converter 10 Mhz,Mast 8m,Cable 15m,	RST 588

RSP Duo, 1M loop 3M above ground, Chris Trask Low Loss Augmented Feedback Amplifier	0 dB above local noise level	Thanks for the effort to get the old lady running . Sadly the signal was very very weak here : 0 dB above local noise level . Due to al kinds of modern electronic trash in the neighbourhood I am no longer able to receive SAQ well. Because of this I was not able the get the message on paper.

United Kingdom	Hatfield	James Moritz	M0BMU	SDR- or Kiwi-SDR and own antenna.	Airspy HF+ SDR and PA0RDT MiniWhip antenna	RST 599	Nice reception this morning with low QRN for the summer time. I used my electromechanical RX (http://www.wireless.org.uk/mechr.htm) for the first time in a few years. Good to hear SAQ on the air again, and wishing everybody well in the current pandemic. Reception of the 1200utc broadcast was good, but with noticeably more QRN than the 0900utc transmission. The electromechanical receiver was used again, also a Telefunken ELK-639. Good to hear the alternator TX on the air once more - I look forwards to the Christmas broadcast - 73 de M0BMU
United Kingdom	Ross-on-Wye	Richard Tofts	M0HNK	SDR- or Kiwi-SDR and own antenna.	Home- made Loop antenna, tuned with DIP-switch capacitor array. I used a short earth spike of around 60cm which helped a lot. The output of the antenna was amplified by a simple TL072 op-amp with variable gain, straight into the headset input of my HP laptop. This was hastily put together yesterday in order to receive the transmissions. I used SAQRx to receive the first transmission and HDSDR for the second one. It took me a long time afterwards to decode the message - I am very slow at decoding morse code! I was impressed with the signal strength. There was some local electrical noise present as the receiver was still quite close to the house (about 10 metres away).	RST 559	Lovely clear copy on both 10am and 1pm transmissions (both 559). Thank you so much for the message and for keeping SAQ on the air. If you are interested, I can email a file with recordings of both the morning and afternoon transmissions as received here in Herefordshire UK. 73 Richard (M0HNK)
